### **16. Modern Economics**

This modern economics course will teach you about inflation, deflation, capacity utilisation, employment rates, and the Consumer Price Index (CPI). Economics is a social science that studies how society uses limited resources. It deals with the production, distribution, and consumption of goods and services. To help you understand these concepts, this course will also teach you about the China-US currency situation and Chinese inflation.

### **17. Introduction to Arabic**

Learn important aspects of the Arabic language, including the Arabic alphabet, pronunciation, and basic vocabulary.

Arabic is the first language of hundreds of millions of people across the Middle East and North Africa. Learning this language is a real life achievement. But learning a language is a long project, and you have to start with the most important basics. This course will introduce you to the most important facets of the language, starting with the Arabic alphabet and the pronunciation of Arabic words.

Learning Arabic letters and pronunciation will unlock the rest of the language for you. You will then be introduced to the use of verbs and nouns, and how to read and write simple sentences in Arabic. The course will also cover basic vocabulary such as days of the week, numbers and colours, and will give you the confidence to continue building your knowledge of Arabic vocabulary.

If you want to travel to or live in the Middle East for business or leisure, or converse with Arabic-speaking people in your country, this is an important and possibly life-changing course. If you get the basics of the language correct now, you will make the remainder of your language learning journey so much easier. In just 3 hours, this course will unlock everything you need for that journey, and you will have a much greater understanding of this fascinating and important world language.

### **18. Introduction to Contracts in Law**

This introductory course on contracts in law will teach you about the most important elements that make up a contract. The course also reviews scenarios in which contracts - which are agreements entered into by parties with the intention of creating a legal obligation - can be breached if one or more of the parties involved do not fulfill their part. You will also learn what you have to do to ensure optimum contract remedies.

### **19. Instructional Planning for Successful Teaching**

This Instructional Planning for Successful Teaching course will help you understand the US national and state learning standards as well as curriculum frameworks and guides. Instructional planning is one of the most important skills an effective teacher needs to acquire. With this course, you will learn how to formulate educational objectives as well as how to use your students' interests and abilities to design lesson plans.

## 20. Diploma in Legal Studies - Revised 2017

This course in Legal Studies will provide you with simple definitions and clear explanations of important legal concepts, different types of laws, and how laws are created. The legal system is an integral part of any society, built to protect its citizens and maintain their rights. By taking this free course, your legal system will become clear and accessible to you. That is important knowledge, for life.

## 21. Diploma in Sociology

This diploma course lays out the important concepts and methods of sociology to explain how humans organize themselves into large groups. The study of sociology is crucial for planning and understanding communities to effectively manage their problems. We establish that society is a complex phenomenon with multiple interacting elements and show you how to use sociology to understand them. Sign up to see the world around you with new eyes

## 22. Legal Office Administration
